This TEAM PLAY, Inc. RETROCADE game brings Centipede, Millipede, and Missile Command back together in one cabinet. Players are transported back to the early 1980's to stop the marauding insect invasions of Centipede and Millipede or prevent total world annihilation in the Cold War classic game of Armageddon, Missile Command. Also included in this set is a bowling game called Let's Go Bowling which also has the look and feel of the early 1980's. Four great games in one convenient cabinet.
